

The Callaway C16 represents everything we know about making an automobile. Power, style, craftsmanship and function. C16s come only one way - fully equipped and built to order. They are seriously fast, beautiful and exclusive. Callaway has spent 30 years, engineering, developing and manufacturing over 900 special vehicles for manufacturers from Aston Martin to Volkswagen. We have come to appreciate what works, what doesn't, what's a liability down the road, and what gives lasting satisfaction. We have condensed that knowledge into a series of coordinated modifications, manufactured them from the best materials, and offered them to the enthusiast in packages that treat the car as a well-tuned, systems-engineered entity. That is how we make Powerfully Engineered Automobiles.

"...highly individualized, sharp-handling, meticulously outfitted supercar, one that tops out at a claimed 206 mph in anger but will still return 28 mpg when driven gently." *Road & Track*

"The flesh on your cheekbones ripples back toward your ears in a sort of g-induced perma-grin." *Road & Track*

"...3.3 second 0-60; 10.9 second quarter mile; 206 mph top speed; EPA rating of 18 mpg city and 28 mpg highway. Is this the perfect sports car? We say: "yes" *ign.com*

"It's not from Mars, but the new Callaway C16 Speedster does deliver a blast that's out of this world." *Motor Trend*

"The C16 is incredibly well-balanced and well-engineered, exemplifying Callaway's 20 years of road and track familiarity with the Corvette platform." *Velocity Magazine*
