WOLSELEY "HORNET SPECIAL" SIX-CYLINDER

(For Chassis supplied to Coachbuilders)

INTRODUCTION

THIS list of Spares for the Wolseley "Hornet Special" has been compiled in order to facilitate the ordering of parts which require replacement. The parts are grouped into components, and all the principal pieces are illustrated. When ordering, clients should quote the Service Number, together with the description of the part, in order to minimise the possibility of error.

We would particularly impress upon clients the importance of always quoting the MAKER'S CAR NUMBER (not Registration Number), which will be found on the metal name-plate on the Dashboard Shroud under the Bonnet. The ENGINE NUMBER will be found on the Engine Case (Near-side Rear), and should be quoted in addition to the Car Number when ordering Engine spares. The CHASSIS NUMBER will be found on the Dashboard Shroud under the Bonnet and should be quoted in addition to the Car Number when ordering Chassis spares.

We reserve to ourselves the right to alter any part as may be considered advantageous, and therefore it is possible that illustrations shown in this book may not in all cases exactly resemble the actual part required.

All parts sent to be repaired must be forwarded carriage paid. These may be forwarded to either of the addresses on the title page, and must bear the Sender's Name, Address, and Maker's Car Number.

All parts sent for repairs are acknowledged as soon as received.

To avoid delay, customers with whom we have no ledger account should send cash with order.

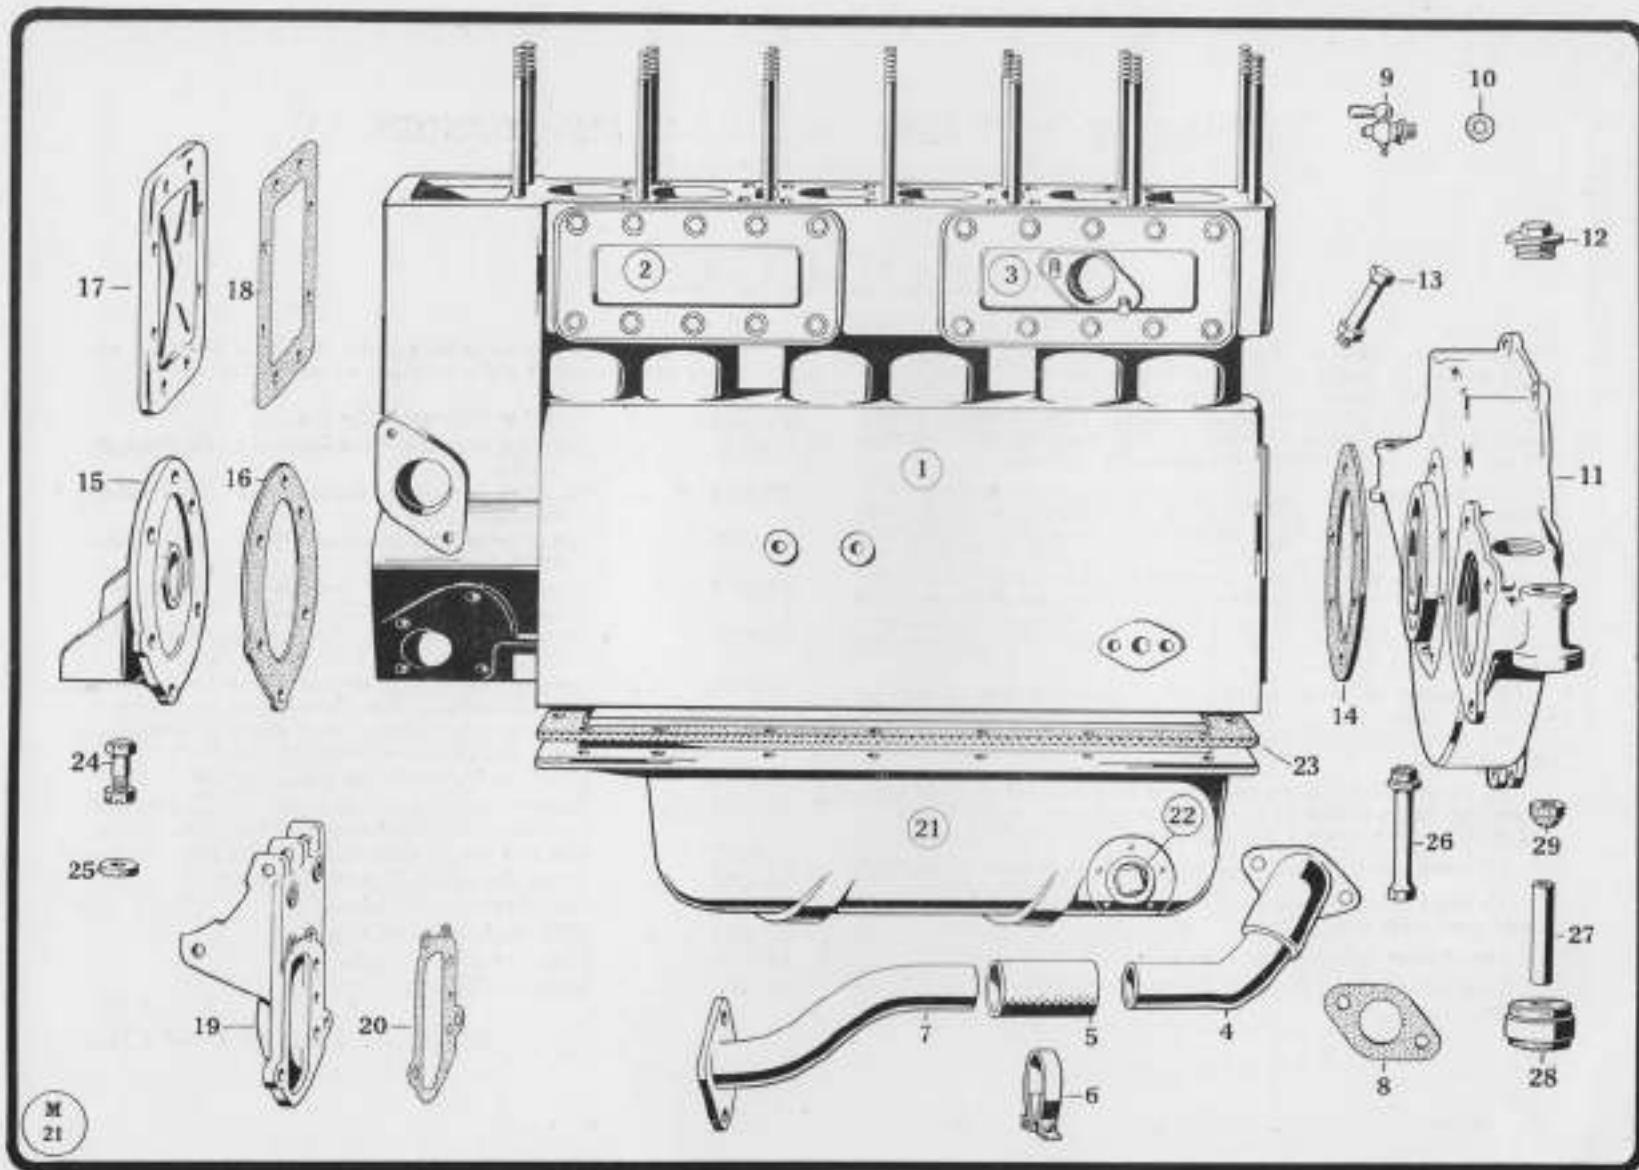

See separate Schedule for Prices.

Instruction Manual shows List of Service Stations for Proprietary Articles.
